

UNIVERSITÀ DEGLI STUDI DI MILANO

Dottorato di Ricerca in Scienze Farmacologiche Biomolecolari, Sperimentali e Cliniche

**Dottorato di Ricerca in Scienze Farmacologiche Sperimentali e
Cliniche
XXXI CICLO**

Esami Finali

17 DICEMBRE 2018

**SALA CONSIGLIO – Dipartimento di Scienze Farmacologiche e Biomolecolari
Via Balzaretti 9– Milano**

Coordinatore:

Prof. ALBERICO L. CATAPANO

Commissione:

Prof. Pier Luigi Canonico

Prof. Giambattista Bonanno

Prof.ssa Paola Sacerdote

**PROGRAMMA 17 DICEMBRE 2018 – ORE 09:30
SALA CONSIGLIO - VIA BALZARETTI 9**

9:30 Valentina Alfieri Locally expressed melanocortin receptors modulate human macrovascular remodeling	10:30 Giulia Dell’Omo Identification and characterization of SIRT1 as a novel target of NSAIDS chemoprevention
10:00 Paola Brivio Stress exposure as risk factor for psychiatric disorders: from functional characterization to pharmacological intervention	11:00 Ilaria Di Renzo Acid sphingomyelinase as a new pharmacological target in the acute and chronic muscle damage: an alternative strategy for muscular dystrophies therapy
11:00 -11:15 BREAK	11:15 Marco Fumagalli Strawberry(<i>FragariaX ananassa</i> Duch.) tannins as ingredients of nutraceuticals with potential anti-gastritis properties
11:45 Pierpaolo La Fauci Assessment of endocrine active substances using in silico and reporter assays in cell and mice	12:15 Silvia Marchianò Clinical and experimental evidences of direct vascular effect of proprotein convertase subtilisin/kexin type 9

**PROGRAMMA 17 DICEMBRE 2018 – ORE 14:00
SALA CONSIGLIO - VIA BALZARETTI 9**

14:00 Annalisa Moregola The long pentraxin 3 plays a key role in the immunomodulation of diet-induced obesity	15:00 Lara Pizzamiglio Effects of ATM kinase inhibition on brain development
14:30 Chiara Pavanello Genetic LCAT deficiency and atherosclerosis: studies on endothelial cells and monocytes	15:40 PROCLAMAZIONE
